**SCHOOL MEAL/FEEDING PROGRAM(S)**

School year: 2020–2021
- School Meals (Kouluruokailu)

**Lead Agency:** Finnish National Agency for Education

**NATIONAL LAWS, POLICIES, AND STANDARDS**
- National school feeding policy
- Nutrition
- Food safety
- Health
- Agriculture
- Private sector involvement

Line item in the national budget...\n\n| Yes | No | No response |
|-----|----|-------------|

**BUDGET**

School meals (free of charge for all students at all education levels) are mandated in school legislation and funded through the general budget for education.

Includes funding from the United States Department of Agriculture  
\n| Yes | No | No response |
|-----|----|-------------|

**INFRASTRUCTURE**

All schools in Finland have electricity, piped and clean water, and flush toilets, while most have kitchens and dedicated eating spaces/cafeterias. School meals and snacks are prepared on-site (in school kitchens) and off-site (in municipalities or the private sector and then transported to schools).

**SPECIAL NOTES**

The school feeding program in Finland is inclusive of the European Union school fruit, vegetables, and milk scheme.

**MEALS/SNACKS/MODALITY**

- Breakfast
- Lunch
- Dinner
- Snacks
- Take-home rations
- Other

- Grains, cereals
- Roots, tubers
- Legumes, pulses, nuts
- Dairy products
- Eggs
- Meat
- Poultry
- Fish
- Green, leafy vegetables
- Other vegetables
- Fruits
- Oil
- Salt
- Sugar

- Dairy milk
- Yogurt drink
- Fruit juice
- Tea
- Water
- Other

**Prohibited food items:** Soft drinks, juices, sweets and/or other products that contain a high level of added sugars, salt, or unsaturated fat are discouraged.

**FOOD SOURCES**

- Purchased (domestic)
- In-kind (domestic)
- Purchased (foreign)
- In-kind (foreign)

**COMPLEMENTARY ACTIVITIES**

- Handwashing with soap
- Height measurement
- Weight measurement
- Testing for anemia
- Deworming treatment
- Eye testing/eyeglasses
- Hearing testing/treatment
- Dental cleaning/testing
- Menstrual hygiene
- Drinking water
- Water purification

**COMPLEMENTARY EDUCATION PROGRAMS**

- Food and nutrition
- Agriculture
- School gardens
- Hygiene
- Health
- Reproductive health
- HIV prevention
- Physical education

The checked items were provided in most or all participating schools.

NUTRITION

School feeding program(s) included/involved the following:

- Fortified foods
- Bio-fortified foods
- Micronutrient supplements
- Nutritionists involved
- Special training for cooks/caterers in nutrition

Objective to meet nutritional goals
Objective to reduce obesity

Food items fortified/biofortified:
Not applicable

Micronutrients:
Not applicable

ADDITIONAL INFORMATION

Finland places a strong emphasis on school health, with a school health promotion study included as part of the school meal program monitoring. National guidelines are provided for what foods should be made available in schools. Although oil, salt, and sugar are allowed, their use is limited.

STUDIES CONDUCTED

Many studies have been conducted on school health, food and nutrition education, sustainable food sourcing in schools, and children’s eating habits in Finland, authored by the Finnish Institute for Health and Welfare and the Ministry of the Environment, among others.

RESEARCH NEEDED

Research on food-related education would be appreciated.

AGRICULTURE, EMPLOYMENT, AND COMMUNITY PARTICIPATION

Jobs created by school feeding programs*

- Cooks and food preparers
- Transporters
- Off-site processors
- Food packagers and handlers
- Monitoring
- Food service management
- Safety and quality inspectors
- Other

*If blank, no response was provided.

Farmers were involved with the school feeding program(s)...

- Yes
- No
- No response

Other private sector (for profit) actors were involved...

- Yes
- No
- No response

There was a focus on creating jobs or leadership or income-generating opportunities for...

- Women
- Other groups
- Youth
- No response

There was community engagement (by parents or others) in the school feeding program(s)...

- Yes
- No
- No response

Were there links between food banks and the school feeding program(s)?

- Yes
- No
- There are no food banks in this country

ADDITIONAL INFORMATION

The entire school community is engaged in school feeding in Finland, and teachers and other school personnel guide and mentor pupils during mealtimes. The students’ participation in school meals (assisting the school canteens) is also part of their education. Some schools have school food committees comprised of teaching staff, pupils, school health care professionals, and food service providers.

SUCCESSES AND CHALLENGES

Among the successes related to school feeding in Finland, food-related education is integrated into school meals, combining the activities of eating and learning together. There is an emphasis on cooperation and the creation of an “ecosystem” around school meals to promote well-being and learning, particularly about a sustainable way of living, cultural competence, and instruction in good manners. The Government has launched a program for free school snacks, and some schools have also begun to serve free breakfast. Nevertheless, there remains a need to increase students’ consumption of vegetables and fruits. Consideration should also be given to ensuring that students have adequate time for eating, and that the time at which meals are served is suitable for children.

EMERGENCIES/COVID-19 PANDEMIC

In response to the COVID-19 pandemic, some schools operated remotely in 2020–2021, and when students had to stay home, they were given an option to come to school to eat or receive a take-home meal. Meals were sometimes delivered to students’ homes, and sometimes they were provided to students or their parents to pick up at school. When meals and snacks were served in schools, accommodations were made to follow social distancing guidelines (e.g., fewer students eating together at the same time). School feeding operations in Finland were maintained throughout the 2020–2021 school year.

GCNF GLOBAL SURVEY 2021
SCHOOL MEALS
KOULURUOKAILU

Lead implementer(s): The Ministry of Education and Culture, Finnish National Agency for Education, Ministry for Agriculture and Forestry, Finnish Food Authority, and European Union

OBJECTIVES:
- To meet educational goals
- To meet nutritional and/or health goals

MODALITIES OF PROVIDING STUDENTS WITH FOOD:
- In-school meals
- In-school snacks
- Take-home rations

FREQUENCY AND DURATION:
- 5 days per week during the school year

TARGETING:
Universal

HOW MANY STUDENTS RECEIVED SCHOOL FOOD IN 2020–2021 SCHOOL YEAR?

The numbers for secondary students include those in lower secondary, upper secondary, and vocational schools.

FOOD AND BEVERAGE ITEMS:
- Grains, cereals
- Roots, tubers
- Legumes, pulses, nuts
- Dairy products
- Eggs
- Meat
- Poultry
- Fish
- Green, leafy vegetables
- Other vegetables
- Fruits
- Oil
- Salt
- Sugar
- Dairy milk
- Water

FOOD SOURCES:
Purchased food (domestic and foreign sources)

ADDITIONAL INFORMATION:
School feeding was first introduced in Finland in the early 1940s. Although school feeding is not a separate line item in the national budget, school meals are guaranteed for all. Decision-making related to menus and food sourcing is highly decentralized, with local governments managing the program. There are also various programs (such as Ruokaturku, Kattovaa-kuoulounas, and Maistuva koulu) aimed at supporting the school meal system and providing food-related education.
