### Efforts to limit food waste or packaging waste

The National School Feeding Program in **Tunisia** uses marketing campaigns to encourage schools and students not to throw still-edible food away.

In **Argentina**, food waste is addressed by turning it into compost for school gardens.

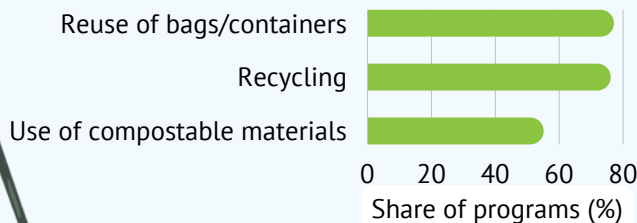

In **Slovenia**, schools have reduced waste by 42% as part of the "Food is Not for Waste" project by the Eco-School program.

In **South Africa**, food waste in the National School Nutrition Program is minimized by distributing any excess food to orphans and other vulnerable people.
