## ADDITIONAL INFORMATION

Parents' committees were involved in managing the school meals program. Parents also contributed by supplying water and wood to school sites. Although a large share of the food was received as in-kind donations, some small-scale farmers were involved in the program and were offered agricultural subsidies and forward contracts. The survey noted that the 3,180 cooks were not paid in cash nor in kind but were provided training. Also noted was the fact that a private sector entity contributed by rehabilitating a school.

## SUCSESSES AND CHALLENGES

Positive developments related to school feeding in the Congo included: the existence of a national school feeding policy, the validation of the Systems Approach for Better Education Results (SABER) action plan, the organization of a national forum on school meals, a decree facilitating education access for autochthonous (indigenous) children and literacy for adults, and a tripartite agreement between the Government of Congo, Japan, and the World Food Program.

The challenges associated with school feeding were that the national policy on school meals has not yet been endorsed and needed financial contributions from the government are still to be mobilized.

Pre-school	639	44%	56%
Primary school	57,656	50%	50%
Secondary school	0		
<b>Total</b>	<b>58,295</b>	<b>–</b>	<b>–</b>

### FOOD ITEMS:

Grains/cereals*	Oil*	Salt*
Legumes and nuts	Fish	

\* fortified

### FOOD SOURCES:

2% Purchased (domestic)	2% In-kind (domestic)
0% Purchased (foreign)	96% In-kind (foreign)

### NOTES:

This program is funded by donations from the United States Department of Agriculture, the Government of Japan, and the Government of Congo. A financial crisis in Congo has meant that funding for the school feeding program has been insufficient. Both the financial situation and a crisis of post-electoral violence meant that the frequency with which students received food was reduced in the 2016/17 school year.
