SUCCESSES AND CHALLENGES
Three positive developments include the: introduction of vegetarian meals; fight against food waste; elaboration of a national strategy for the promotion of healthy eating.

Three strengths include the: universal character of the program; healthy and nutritionally balanced meals; association of the program with curricular pedagogical objectives.

There were no setbacks over the past five years.
Challenges related to school feeding include: program management, given its universal character, the number of organizations involved (recipients, suppliers, and others) and the amounts involved.

There is program control and monitoring to guard against corruption.
