Dominican Republic

School Meal Coverage (2022)

All Primary and Secondary School-age Children

- 69% Receiving food
- 25% Enrolled, but not receiving food
- 6% Not enrolled

Only Enrolled Primary Students

- 76% Receiving food

National Laws, Policies, and Standards

- National school feeding policy
- Nutrition
- Health
- Food safety
- Smallholder farms
- Agriculture (apart from smallholders)
- Climate/environment policy
- Private sector involvement

The country had ...

- Inter-sectoral coordination committee for school feeding
- National system for monitoring school feeding

Budget

Total: USD 458,560,032
- Government: 458,560,032
- International donors: 0
- Private sector: 0
- NGOs (domestic): 0
- Other donors: 0

School Foods and Beverages

- Whole grains
- Refined/milled grains
- Blended grain-based products
- Legumes
- Nuts and seeds
- Eggs
- Dairy
- Poultry and game meat
- Red meat
- Processed meat
- Fish and shellfish
- Deep orange vegetables and tubers
- White roots and tubers
- Fruits
- Dark green leafy vegetables
- Cruciferous vegetables
- Other vegetables
- Deep-fried foods
- Sweets
- Liquid oils
- Semi-solid and solid fats
- Salt
- Dairy milk
- Yogurt drink
- 100% fruit juice
- Other fruit drink
- Tea
- Other sugar-sweetened beverages

Prohibited food items

- None

Food Sources

- Purchased (domestic)
- Purchased (foreign)
- In-kind (domestic)
- In-kind (foreign)

Special Notes: Population numbers from the UNESCO Institute of Statistics (UIS) were used to complete this report.
## Infrastructure, Employment, and Complementary Features

### Share of Schools with ...

### Employment

- Total number of cooks/caterers: **1,684**
  - At least 100% paid
  - 25-50% women

**There was a focus on creating job opportunities for...**

- Women
- Youth
- Other Groups

## Additional Information

### Handwashing with soap
- Height measurement
- Weight measurement
- Testing for anemia
- Deworming treatment
- Eye testing/eyeglasses
- Hearing testing/treatment
- Dental cleaning/testing
- Menstrual hygiene
- Drinking water
- Water purification
- School gardens

### Complementary Education Programs

- Food and nutrition
- Agriculture
- Environment/climate/sustainability
- Hygiene
- Health
- Reproductive health
- HIV prevention
- Physical education
- Mental health

### Nutrition

- Fortified foods
- Bio-fortified foods
- Micronutrient supplements
- Nutritionists involved
- Special training for cooks/caterers in nutrition
- Objective to meet nutritional goals
- Objective to reduce obesity

### Limitations on food and beverage marketing...

- On school grounds
- To school age children

**Food for the program was purchased through open-bid (competitive tendering) procedures in which food service was contracted with a purposeful focus on micro, small and medium-sized suppliers. These companies, in turn, purchased food from producers to prepare the school menus. The private sector was thus engaged in food trading and processing for the program. Cooks/caterers were paid by the national government and received special training in portions/measurements and food safety/hygiene. The community of parents and friends of the schools participated in the program through the School Food and Nutrition Committees, and medical societies were also involved to support technical decisions.**
Successes and Challenges

**Successes**

1. Improvement of nutritional quality: In the last five years, school menus have been improved, sugar consumption has been reduced, and fruits have been included in the menu, eliminating nectars.

2. Increased coverage: New initiatives have been enacted to include pre-school students (children from 3 to 5 years old) and adult level (PREPARA) students, as well as the inclusion of students from the 14-24 program.

3. Expansion of supervision capacity: There has been an expansion of supervision and control personnel of participating suppliers, with improved monitoring of food along the supply chain.

4. Inclusion of new initiatives: These initiatives include the Gastronomic Laboratory at SEDE-INABIE and five Rainwater Collection and Use Systems.

5. Strategic alliances to strengthen the School Feeding Program: This includes the Food and Agriculture Organization of the United Nations (FAO), Inter-American Institute for Cooperation on Agriculture (IICA), United Nations Development Program (UNDP), and the World Development Program Food (WFP).

**Challenges**

1. Financial sustainability of the program.

2. Inclusion of new products, such as fruits, on a national scale.

3. Use and consumption of drinking water.

4. Physical spaces for food preparation and consumption in the school environment.

5. There was some concern about faithful compliance with school menus, as suppliers could deliver food that was not included or that did not comply with the established technical sheet.

---

Additional Information

During the 2022 school year, the School Feeding Program did not have a plan in place to mitigate the impact of emergencies, though the program was affected by a natural disaster, extreme food price inflation, and teachers' strike. These emergencies resulted in slightly decreased accessibility (availability and affordability) of food for the program, with a significant increase in the cost of purchasing food. Specifically, climate events in 2022 affected the production of banana, potato, and cassava. In addition, the closure of the border with Haiti impacted trade in some livestock products such as chicken and eggs, with a consequence that these foods were offered more frequently on the school lunch menu. Despite these emergencies, all schools remained open, and there were no interruptions to school feeding operations.

---

Environmental Sustainability

**Targeted climate-friendly foods**

- Yes
- No

**Steps taken to limit food waste**

- Yes
- No

**Steps taken to limit package waste**

- Re-use of bags/containers
- Recycling
- Use of compostable materials
- Use of “bulk serve” containers
- Prohibiting specific types of packaging

---

Emergencies

**Experienced disruptions to school feeding due to emergencies**

- Yes
- No

**Strategies to address the impact of emergencies**

- Seek alternative food sources or suppliers
- Changes in numbers of students fed
- Negotiate better prices with existing suppliers
- Establish alternative supply routes or transportation methods
- Source different or alternative food
- Release of food reserves
- Increase funding or budget allocation for school feeding
- Collaborate with local producers or suppliers to reduce dependence on global supply chains
- Changes in delivery method
- Changes in feeding modality
- Changes in feeding frequency
- No particular strategy was used
School Feeding Program
(Programa de Alimentación Escolar – PAE)

Management

- Lead implementer(s): National Institute of Student Welfare, decentralized body of the Ministry of Education of the Dominican Republic (Instituto Nacional de Bienestar Estudiantil - INABIE - órgano descentralizado del Ministerio de Educación de la República Dominicana - MINERD)
- The national government managed the program (Centralized decision-making).
- National government procured the food

Elements of Home-Grown School Feeding

- Objective for small-scale farmers to benefit from access to a stable market
- Local food sourcing
- Small-scale farmers involved by selling directly (or through their farmer organization) to the program or the schools
- Additional support provided to small-scale farmers
- Country had a law/policy/standard related to small-scale farmers and school feeding programs
- Preferential treatment for small-scale farmers/small farmer organizations/small companies in tendering procedures
- Effort is made to reduce food miles

Objectives

- To meet educational goals
- To reduce hunger
- To meet nutritional and/or health goals
- To prevent or mitigate obesity
- To meet agricultural goals

Modalities of Providing Students With Food

- In-school meals
- In-school snacks

Frequency and Duration

- 7 times per week
- During the school year

Targeting

- Targeting based on school type and grade level

Expenses

- 100%
  - Food
  - Labor
  - Handling, storage, transport
  - One-time fixed costs
  - All other costs

Food Sources

- 92% Purchased (domestic)
- 8% Purchased (foreign)
- 0% In-kind (domestic)
- 0% In-kind (foreign)

Additional Information

Large-scale school feeding began in the Dominican Republic in 1997 with a breakfast program that expanded in 2013 to include other modalities (lunch and in-school snacks). In the 2022 school year, the program reached 6,025 public schools. The National Council for Food and Nutritional Sovereignty and Security (CONASSAN) was responsible for the National Plan for Food and Nutritional Sovereignty and Security. This Council aims to: 1) Design public policies necessary for the country to produce sufficient food in a sustainable manner and with equitable distribution; and 2) Consolidate and strengthen the Dominican Social Protection System to guarantee the right to food and nutrition of the population, especially for the poorest and most vulnerable and with priority to children, pregnant or lactating women, and the elderly.
